

Melville Marine Industries

November 14, 1989

HAND DELIVERED

Mr. James Valenti  
Northern Division  
Navy Installation Restoration Program  
Newport, Rhode Island 02840

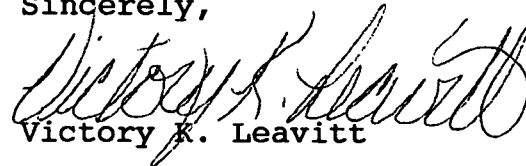

Dear Mr. Valenti:

Pursuant to your conversation today with Mr. Dean Coker, please revise the Technical Review Committee Meeting Minutes dated October 12, 1989. The third paragraph on page 2 should read "An Environmental Assessment is being performed and permit applications are being prepared for submission. The entire Melville Marine site was studied and the only contamination found was oil soaked soils. The risks to the environment and aquatic resources due to site development are being evaluated by MMI."

Please call Mr. Coker if you have any questions.

Thank you for your time.

Sincerely,

Victory K. Leavitt
